55" MirrorMedia MT55TNE-TTS with PC

www.mirrormedia.com

mirror media

At first sight Mirror TV looks familiar. It's a mirror.

With its slim profile and choice of frames, it looks perfectly at home in your bathroom, your kitchen, your living room.

Then you hit the remote control. Suddenly it's not a mirror, it's a flat screen TV.

It can show a pin sharp picture from its built-in TV tuner (HDTV ready) or from satellite, cable, DVD or external PC.

It can even have its own optional built-in multimedia computer, so you can access e-mails or internet, play MP3 audio or MPEG video files, or session your favourite games.

WIRELESS HDMI

Inbuilt Wireless HDMI allows you to wirelessly connect any HDMI source to your MirrorTV supporting full HD 1080p from up to 5m* away. Now all that's required to get your ultraslim MirrorTV working is to hang it on the wall and just add power. Stream your TV/DVD/PC source directly to the MirrorTV via an included HDMI wireless transmitter with inbuilt IR.

FRAMES

With over 100 different standard frame styles and a myriad of colours to choose from (bespoke options also available) your MirrorTV can blend seamlessly into any surroundings. The frame brochure can be downloaded online from www.mirrormedia.com We also provide a free frame sample service.
