Domestic bliss made easy

It's a mirror. It's a TV. It's a PC.

At first sight Mirror TV looks familiar.

It's a mirror.

With its slim profile and choice of frames, it looks perfectly at home in your bathroom, your kitchen, your living room.

Then you hit the remote control.

Suddenly it's not a mirror, it's a flat screen TV.

It can show a pin sharp picture from its built-in TV tuner or from satellite, cable, DVD or external PC.

It can even have its own built-in multimedia computer, so you can access e-mails or internet, play MP3 audio or MPEG video files, or go large on your favourite games.

'Til you zap the off switch.

And it's a mirror again.

Available with 20" to 55" Hitachi plasma or LCD screens, from £1,950.
