The MirrorTV is the best antidote to reality television's unmitigated drivel. If you find yourself being drawn into the hell of reality television, at least watch it on this 42in Hitachi plasma (also available in 20-46in LCD), which becomes a mirror when switched off. When the turgid antics of the morons on telly hit rock bottom, switch to mirror mode and gaze at the infinitely more beautiful, interesting, exciting and worthwhile experience that is your own life.
