

MIRRORMEDIA

When it comes to mirror TVs MirrorMedia are at the forefront of this emergent field. The niche market is growing fast and MirrorMedia has recently announced the release of its latest range of mirror TV options which include screen sizes up to 65-inches, further boosting its position in market. Featuring inbuilt speakers and RS232 control the new mirror TVs come in a range of over 100 frame choices with bespoke options available on request. Joining the plethora of mirror TV options already available the new range ensures MirrorMedia can deliver screens from 10.4- to 65-inches for use in all but wet rooms.

On top of this MirrorMedia has a selection of bathroom TV options for those who like to catch up on their shows whilst bathing or in the shower. Providing both in-wall and surface mount options the bathroom screens come with MirrorClear technology ensuring crystal clear viewing whatever their surroundings. Designed with installers in mind MirrorMedia provide installer support including advice on ventilation and cooling.

PANASONIC

With such an expansive range of options no television feature would be complete without a nod to Panasonic. The latest offering, the TH-65VX300 is available here in the UK through AWE's award winning CI Dealer agreement.

The TH-65VX300 joins Panasonic's existing range of 3D custom home theatre (CHT) products, which includes the 85-, 103- and 152-inch options. This new screen has been developed with the ultimate picture quality in mind. Designed to a reference standard, its powerful 30 bit visual engine is able to produce both 2D and 3D images with stunning life-like details and virtually zero cross talk or motion issues. Panasonic has made impressive technology developments with this screen to make it fit for high end customers wanting the best display possible, without going to the larger format display sizes.

"The demand for bigger screens in the home continues to grow with both HD and 3D content driving the growth above the ever popular 50-inch size" says Stuart Tickle, Managing Director of AWE. "This TH-65VX300 is the perfect product for premium installations that demand the ultimate in quality, but where an 85-inch or bigger screen size is not required. Not only does it have a high end black brushed aluminium finish which suits any application, but it also boasts improved technology and features which provide superior picture quality, full HD 3D compatibility and professional levels of calibration and control. With this screen, Panasonic is bringing broadcast level technology into the home, with an exceptional viewing experience that delivers realistic and comfortable 3D images."
